CORE PROFILE

Full-stack developer with a slight focus on the front-end. I have a diverse range of experience, from the start-up world to the enterprise. I use functional programming expertise, agile and iterative methodology, prioritisation skills and a wide technological range of knowledge to find clean solutions to the right problems, and to succeed in an environment with many unknowns.

RELEVANT EXPERIENCE

FRONTEND LEAD

Feb 2019 - May 2020

Responsible for front-end architecture of a React-based single-page application and a REST-based "backend-for-frontend". Developed microservice backends in AWS including billing. Helped creating engineering culture and best practices.

- TypeScript • JavaScript • React • Redux
- styled-components • node.js • express
- Domain-driven design • Hexagonal architecture • Java
- Kotlin • AWS • Dynamo DB • PostgreSQL • Webpack
- Git • REST

PROPER

Copenhagen + Remote

SENIOR FULLSTACK ENGINEER

Sep 2017 - Jan 2019

Responsible for developing and maintaining seatgeek.com while helping form and grow a new web-focused team within an existing organization. Defining best practices for coding standards and development process.

On call to debug production issues occurring during European working hours.

- JavaScript • Flow • React • Redux • styled-components
- GraphQL • node.js • PHP • AWS • MySQL • Webpack
- Git • HTML5 • CSS3

SEATGEEK

New York + Remote
